FREE ENERGY MOBILE CHARGER

Introduction:
This project is a free energy mobile charger. It is a device that can charge a mobile phone without the need for a power source. It is a simple and easy-to-use device that can be used anywhere and anytime.

Working:
The working of this project is based on the principle of electromagnetic induction. It uses a small motor to generate electricity, which is then used to charge a mobile phone. The motor is connected to a battery, and the battery is connected to a mobile phone. When the motor is turned on, it generates electricity, which is used to charge the mobile phone.

Components:
The components of this project are a small motor, a battery, a mobile phone, and a USB cable. The motor is connected to the battery, and the battery is connected to the mobile phone. The USB cable is used to connect the mobile phone to the charger.

Advantages:
The advantages of this project are that it is a simple and easy-to-use device, it is portable, and it can be used anywhere and anytime. It is also a cost-effective device, as it does not require any special equipment or materials.
