SUMMARY REPORT ON CLEANLINESS DRIVE

College is agile to take initiatives for cleanliness in the campus as well as in society not only under the Swacch Bharat Abhiyan Programme on any occasion but college students and staff are taking it as their moral duty. In a regular mode with the help of students and stakeholders, college is participating in this drive. With the help of students various activities are performing by college in local villages, offices and in communities.

Department of Chemistry

“Drinking Water analysis of different water sample collected from different regions of Manora”

Aim & Objectives:

- 1) To develop awareness among students and society about water**
- 2) To create scientific temper within students.**
- 3) To establish familiar relation between college and society.**

Procedure for analysis: -

This activity will be run by a simple procedure. Firstly, department of chemistry give a notice to the all students of B.Sc. In this notice we tell them to collect the different water sample of drinking water from different homes of village where they live. During doing this, they have to note down the name of that men or women and village. After collecting these samples that student submits the water sample in chemistry department. Now this water sample will be analyzed by the final year students. In this analysis working group check some basic parameters like pH, TDS, DO, Conductance, Salinity etc.

To check or analyze these parameters we use some simple methods like titration, electrolysis or department have a good quality water analysis kit by using this kit we can find out different parameters of water.

After analyzing water sample, we note all the readings or value of these parameter and make a report table of that particular sample. Now this report will compare with the standard values that parameter given by WHO (World Health Organization). After comparing these reports, we put our conclusion that whether that water sample is good for drinking purpose or not.

If that water sample is not good for drinking purpose then our student will meet them and aware them about the effects that will be caused by this water. Not only tell them about effect but also how to use that water sample after some purification. They tell them some traditional and new method to purify the water sample and save from different diseases and give some percussion like heat the water and filter it from the cloth of very small pore and cool that and use. Like information will be provided to that people.

SUMMARY REPORT ON Felicitation of meritorious students

College is very active to promote its students by all means, not only giving a good education and other multidimensional facilities too. Every year on the occasion of 15th August, the meritorious students of Arts, Science and Commerce are facilitated with honour and regards by trophy and certificates. Their parents are also facilitated by the college. Such type of activity develops zeal among students to enhance their achievements academically as well in sports too. On 21st July 2014 meritorious students (25) of class 10th & 12th standard students were facilitated by college, these students were belongs to different schools of this Taluka. In the month of June-2015, 84 students were facilitated in the college. In the month of July-2016, in same way 74 students of 10th & 12th standards were facilitated. In July-2017, total 82 students of different schools of Taluka were facilitated, in July- 2018 total 102 students were facilitated in a same way.

**SUMMARY REPORT
ON**

Formation of seed bank and seed balls

College, staff, administration, management and students are very much concern about environmental protection and sustainability. Eco-friendly activities are the key part of the college, just before the every rainy season, with the help of students and staff seed balls prepared in every year and implanted /thrown in to barren land for better plantation on suitable time by concern of forest department. This activity plays a key role among students to develop a eco-sensitive temperaments and interaction with society.
